Education

Simon Fraser University May 2026 - May 2028
Bachelor of Science in Computer Science *Vancouver, BC*

- **Relevant Coursework:** Data Structures and Algorithms (C++), Web design (React), Discrete Mathematics (Python)

Langara College Sept 2023 – May 2026
Associate of Science in Computer Science *Vancouver, BC*

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, Swift, C#, C++, SQL
Frameworks & Libraries: React, React Native, Angular, Node.js, Express.js, Expo, TailwindCSS
Cloud & Databases: Amazon Web Services (AWS Lambda, Cognito, API Gateway), Firebase, Firestore, Google Cloud
Developer Tools: Git, GitHub, Docker, VS Code, EAS Build, REST APIs

Experience

SFU Surge May 2026 – Present
Software Developer *Burnaby, BC*

- Helped develop a hackathon dashboard in Next.js and TypeScript that supports 800+ hackers concurrently during SFU Surge's live events.
- Developed a dynamic application-form builder with live preview, per-question regex validation, and role-based (owner/admin) access control, backed by tRPC and Drizzle ORM on PostgreSQL.

Wun2Free Entertainment Feb 2024 – Present
Software Developer *Richmond, BC*

- Built a user authentication API with AWS Cognito, implementing registration and login flows that serve 150+ active users with secure session management.
- Designed and deployed serverless microservices using AWS Lambda and API Gateway, reducing infrastructure costs and enabling auto-scaling for production workloads.
- Developed RESTful API endpoints with Node.js and Express, integrating with front-end applications to support core product features.

Projects

Chapt | *React Native, Expo, TypeScript, AWS CDK, Lambda, DynamoDB, S3, Cognito* Feb 2026 – Present

- Launched Chapt (chapt.app) on the iOS App Store, a polaroid-style shared photo album that attracted 50+ signups within the first week of release.
- Architected a serverless AWS backend with 30+ Lambda functions and 16 DynamoDB tables, deployed via AWS CDK behind HTTP and WebSocket API Gateways.
- Built a social layer featuring an asymmetric follow graph, public profiles, follower-only chapt invitations, real-time chat, and push notifications.

Flicka | *React Native, Expo, Firebase, TypeScript, TailwindCSS* Jan 2025 - Dec 2025

- Built a social photo-sharing mobile app where users post one photo per day to maintain streaks, featuring real-time sync across iOS and Android devices.
- Implemented phone number authentication and cloud storage with Firebase Auth and Firestore, handling image uploads and real-time data synchronization.
- Deployed production builds via EAS Build and managed app distribution for physical device testing and App Store submission.

Encore | *React Native, Expo, TypeScript, Firebase, TailwindCSS, Ticketmaster API* Oct 4–5, 2025

- Built a concert companion app integrating the Ticketmaster API to let users discover local events, track friends' attendance, and share seat locations.
- Designed an intuitive event feed and social features using Expo and TypeScript with TailwindCSS for cross-platform styling.
- Awarded "Most Likely to Become a Startup" out of 220 projects at SFU Surge's StormHacks hackathon.
